

BIG CRUSADES

Asset List for Auction Round

Instructions for Participants

The following is the official list of assets available for acquisition during the auction round of the competition.

- All assets are available for open competitive bidding.
- Teams may acquire any combination of assets within their allocated capital.
- The base price listed represents the minimum opening bid for the asset during the auction.
- Teams should evaluate assets based on their own strategic judgement and business model vision.

Note

Teams are encouraged to carefully assess how assets can complement each other in building a coherent and resilient business model.

During the course of the competition, a macroeconomic shock or systemic market event may be introduced that alters the valuation environment of certain asset categories. Such events simulate real-world economic disruptions such as sectoral booms, regulatory changes, supply-chain shocks, or financial tightening.

Participants are therefore expected to account for uncertainty, diversification, and risk management while constructing their asset portfolios.
